Spring 2023

*I love all things eco. I am ready for club every week but I don't like getting my hands dirty so am always prepared with my gloves.*

The committed Eco Team have shown their passion this year by attending a weekly after school club. We have planted lots of seeds ready for growing food at the front of school. We have also planted strawberry plants and are wondering who will get to eat the first strawberry.

We started this half term with an assembly for each key stage about recycling. We talked about recycling in the dinner hall and recycling pens and other items in general. Each key stage now has an eco table where they can place pens and bottle tops for recycling. The audience also shared ideas about what they would want from the Eco team – sorry we cannot grow mangoes and bananas! But we can grow other fruit and veg.

Whilst we waited for the weather to warm up, the children did some beautiful artwork of flowers and set up the big eco table in the KS2 corridor.

Mrs Tomlinson says – I am so proud of the Eco Team and the passion and enthusiasm they have for taking care of their local environment and the wider world.
